Feature:	scat, 2 woman eating shit and drinking pee.mpg	2.39
Total running time:		2.39

**Summary of reasons
for classification:**

The computer moving image file *scat, 2 woman eating shit and drinking pee.mpg* is classified as:
Objectionable.

The publication promotes and supports the use of urine and excrement in association with sexual conduct. The focus of the short clip is the explicit presentation of urination and defecation, and the use of these substances in a sexual context. The purpose of the images is to titillate and arouse viewers. By showing the use of urine and excrement in a sexual context as pleasurable and arousing, the publication makes these sexual practices appear desirable and acceptable.

The classification of this publication interferes with the freedom of expression as set out in section 14 of the New Zealand Bill of Rights Act 1990. This outcome is consistent, however, with Parliament's intention in the Films, Videos, and Publications Classification Act 1993 that publications which promote and support the use of urine and excrement in association with sexual conduct are objectionable.
